

RABBANI MOHAMMAD KUTHUBHE SHAIK

Senior Product Manager | CRM & Customer Data Platform | Identity Resolution & Data Governance
Dubai, UAE | +971 56 526 8682 | rabbaniau@gmail.com | [linkedin.com/in/rabbani-shaik-3a6025a7](https://www.linkedin.com/in/rabbani-shaik-3a6025a7)

PROFESSIONAL SUMMARY

Senior Product Manager with 10+ years in technology and 7+ years across CRM, customer data platforms, loyalty, and MarTech, specializing in turning fragmented customer data into a unified, governed single source of truth. Currently lead the customer data platform for Apparel Group across 85+ brands, 14 countries, and millions of customers — owning identity resolution, data quality, large-scale migrations, multi-region segmentation, and access governance. Proven at building unified customer data models, integrating CRM and data systems, and driving adoption with measurable business outcomes, working hand-in-hand with engineering and data teams.

CORE SKILLS & EXPERTISE

- **CRM & Customer Data:** CRM platforms, Customer Data Platforms (CDP), MoEngage, Loyalty platforms, unified customer view / single source of truth, identity resolution
- **Data & Integration:** Customer data modelling, data migration at scale, system integrations & APIs, data warehouse pipelines, data mapping, cleaning & validation
- **Governance & Quality:** Data governance frameworks, access control / data segregation, data integrity & consistency, multi-business / multi-region data management
- **Product & Delivery:** Product strategy & roadmap, discovery, PRDs, user stories, acceptance criteria, UAT & go-live, adoption, Agile / SAFe
- **Stakeholder & Tools:** Cross-functional leadership (commercial, marketing, operations, support, engineering, data), vendor management, Jira, Confluence

PROFESSIONAL EXPERIENCE

APPAREL GROUP — Dubai, UAE *Global retail group: 2,200+ stores, 85+ brands, 14 countries, millions of customers*

Product Lead – CRM, Customer Data & MarTech Platforms

Oct 2021 – Present

Flagship – Customer Data Platform & MoEngage (data warehouse ↔ CDP ↔ loyalty)

- Delivered (Mar 2026) a large-scale migration of unified customer data from the enterprise data warehouse to the MoEngage CDP — **16M profile records, 48M transaction summaries, 98M transaction line items, and 500K loyalty point balances** — owning identity resolution, data cleaning, field mapping, and end-to-end testing.
- Defined the **unique-identification logic** to resolve customer identity across systems, establishing a clean single customer view as the basis for segmentation and engagement.
- Currently leading a **multi-region consolidation** of the GCC customer base onto a single unified dashboard (aligned to the GCC single-app model) — migrating the GCC subset of **~13M profiles and ~36M transactions** and implementing **Teams-based access governance** to isolate campaigns and data between business units while preserving data integrity.
- Designed the **GCC vs. India data segmentation** for the group super-app, partitioning transaction data using **store code as the unique cross-region key** to guarantee accurate regional separation.
- Own the **MoEngage – Epsilon (loyalty) integration**, coordinating profile and transaction data feeds from the in-house data team into the CDP to keep customer and loyalty data synchronized.

Loyalty, MarTech & Analytics

- Led the loyalty platform roadmap and migrations that grew customer registrations by **60% over three years**, onboarded **15 brands**, and contributed a **30% increase in loyalty-driven sales** — recognized as Apparel Group Retail Employee of the Year 2023.
- Translate marketing, CRM, and growth requirements into product specs, workflows, data capabilities, and automation; partner closely with engineering, data, CRM, and vendors.
- Lead discovery across data integrations, performance reporting, attribution-style insights, alerts, and campaign-readiness workflows; validate with rapid prototypes before build.
- Establish governance, SOPs, and documentation ensuring consistent, high-quality execution across brands and regions; report progress and outcomes to senior leadership.

CHALHOUB GROUP — Dubai, UAE *Luxury retail group: \$3B+ revenue, 600+ stores*

Product & Technical Lead – Retail Systems & Cloud Platforms

Nov 2019 – Sep 2021

- Led enterprise product initiatives across POS, loyalty, and cloud platforms, owning requirements and workflows through large-scale modernization and cloud migration.

- Acted as the primary interface between business stakeholders and engineering; improved visibility into transaction data, customer behaviour, and operational performance.
- Owned testing strategy, rollout readiness, and post-launch stabilization for mission-critical systems.

EDEKA DIGITAL — Hamburg, Germany

Technical Consultant – Digital & Analytics Systems

Oct 2018 – Nov 2019

- Supported large-scale digital retail platforms incl. POS and payments; improved platform reliability and reporting accuracy through structured QA and automation.

INFOSYS LTD — Hyderabad, India

Project & QA Lead – Enterprise Platforms

Oct 2013 – Sep 2018

- Delivered transformation and quality initiatives for enterprise retail and analytics platforms; supported multi-region rollouts of customer-facing and internal SaaS platforms.

CERTIFICATIONS & RECOGNITION

- SAFe 6.0 Product Owner / Product Manager (POPM)
- Product School – Mini Certifications
- Retail Employee of the Year 2023 – Apparel Group

EDUCATION

Bachelor of Technology (B.Tech) – Andhra University, India
